Eco Corner (brought to you by the Chartwell Eco Church team)

Chartwell Church is an Eco Church. Every week, we will be sharing tips on aspects of Creation Care and how to bring this into our everyday lives.

Tip of the week: Did you know that the increased intensity of storm events (rain) that we are seeing currently is a product of climate change? As the earth warms, more evaporation occurs from the oceans. A warmer atmosphere can also store more water temporarily, before releasing it as rain. This leads to more intense storms. Reducing our emissions now will help the situation in the future. One thing that we can do as individuals is to support advocacy events like Student Climate Strikes. See below for details on the next one! Give them your support. Help them make banners (they will be making them at our church, day TBC), join them at the march, write letters of support to media, join in their demands! Contact Emily Cox (ecox19246@gmail.com) for more information.
