What can we do in NZ?

Only buy responsibly sourced products, especially products like beef, coffee, soy, wood (mahogany), and anything made with palm oil!

The eye opening WRI study can be found here:

<https://research.wri.org/gfr/global-forest-review>

Tropical primary forest loss, 2002-2022

Non-fire related loss can occur from mechanical clearing for agriculture and logging, as well as natural causes such as wind damage and river meandering. The three-year moving average may represent a more accurate picture of the data trends due to uncertainty in year-to-year comparisons. All figures calculated with a 30 percent minimum tree cover canopy density.
