## Eco Corner

This inaugural event brings families, community groups, volunteers and conservation experts together to celebrate and nurture the work being done to protect our native species from invasive predators.

The central Waikato region encompasses a wide range of ecosystems, including forests, wetlands, lakes, and rivers supporting a range of native plant and animal species. From endangered birds and bats to unique wetland habitats, our biodiversity highlights the need for conservation efforts to protect its rich natural heritage.

Aotearoa's Predator Free 2050 goal is to eradicate our three most damaging predators (rats, stoats and possums) and we all have a role to play.
